

## Subject index

- A/B ratio**, blood flow velocity waveform, uterine artery, pulsatility-index, reproductibility, normal pregnancy, maternal heart rate, 55
- acid phosphatase polymorphism**, birth weight, duration of gestation, preterm births, congenital abnormalities, 257
- acid phosphatase polymorphism**, diabetic pregnancy, foetal macrosomia, 265
- active expiration**, pneumothoraces, mechanical ventilation, premature newborn, 1
- behavioural state variables**, fetal blood flow velocity waveform, fetal descending aorta, 187
- birth weight**, acid phosphatase polymorphism, duration of gestation, preterm births, congenital abnormalities, 257
- blood flow velocity waveform**, uterine artery, pulsatility-index, A/B ratio, reproductibility, normal pregnancy, maternal heart rate, 55
- brain morphology**, environmental diversity, 107
- brain pathology**, periventricular leukomalacia, infant brain, ultrasound, 205
- CK-BB**, intracranial haemorrhage, preterm, 165
- classification system**, neonatal status, high risk infants, developmental outcome, principal components analysis, 233
- clonidine**, placental transfer, neonatal adaption, hypertensive pregnancy, 275
- congenital abnormalities**, acid phosphatase polymorphism, birth weight, duration of gestation, preterm births, 257
- developmental outcome**, neonatal status, high risk infants, classification system, principal components analysis, 233
- diabetic pregnancy**, foetal macrosomia, acid phosphatase polymorphism, 265
- differentiation**, perinatal hypothyroidism, glia, hippocampus, 7
- dissimilar twins**, neurological outcome, minimal brain dysfunction, 245
- drug exposure**, ultrasonography, early pregnancy, fetal movements, 71
- duration of gestation**, acid phosphatase polymorphism, birth weight, preterm births, congenital abnormalities, 257
- early discharge**, postpartum care, father, infant care, parental leave, 19
- early pregnancy**, ultrasonography, fetal movements, drug exposure, 71
- environmental diversity**, brain morphology, 107
- father**, early discharge, postpartum care, infant care, parental leave, 19
- fetal blood flow velocity waveform**, fetal descending aorta, behavioural state variables, 187
- fetal breathing movements**, pulmonary hypoplasia, oligohydramnios, premature membrane rupture, ultrasound, 37
- fetal descending aorta**, fetal blood flow velocity waveform, behavioural state variables, 187
- fetal movements**, ultrasonography, early pregnancy, drug exposure, 71
- foetal macrosomia**, diabetic pregnancy, acid phosphatase polymorphism, 265
- follow-up**, hypotonia, minor neurological dysfunction, placenta, preterm birth, intra-uterine growth retardation, 79
- glia**, perinatal hypothyroidism, differentiation, hippocampus, 7
- heart rate patterns**, sleep, home cardiopneumography, normal infants, infants at-risk for SIDS, 175
- herbs**, traditional Chinese medicine, infant supplementary medicinal foods, 157
- high risk infants**, neonatal status, developmental outcome, classification system, principal components analysis, 233
- hippocampus**, perinatal hypothyroidism, differentiation, glia, 7
- home cardiopneumography**, heart rate patterns, sleep, normal infants, infants at-risk for SIDS, 175
- hospital delivery**, perinatal mortality, intended place of delivery, 29

**human fetus**, middle cerebral artery, linear-array pulsed Doppler method, 195

**hypertensive pregnancy**, clonidine, placental transfer, neonatal adaption, 275

**hypotonia**, minor neurological dysfunction, follow-up, placenta, preterm birth, intrauterine growth retardation, 79

**infants**, premature infants, mothers, mother-infant interaction, social environment, 221

**infants at-risk for SIDS**, heart rate patterns, sleep, home cardiopneumography, normal infants, 175

**infant brain**, periventricular leukomalacia, ultrasound, brain pathology, 205

**infant care**, early discharge, postpartum care, father, parental leave, 19

**infant supplementary medicinal foods**, traditional Chinese medicine, herbs, 157

**intended place of delivery**, hospital delivery, perinatal mortality, 29

**intracranial haemorrhage**, CK-BB, preterm, 165

**intrauterine growth retardation**, hypotonia, minor neurological dysfunction, follow-up, placenta, preterm birth, 79

**intraventricular haemorrhage**, pulmonary surfactant, randomized trial, premature infant, respiratory distress syndrome, pancuronium, 41

**linear-array pulsed Doppler method**, middle cerebral artery, human fetus, 195

**maternal heart rate**, blood flow velocity waveform, uterine artery, pulsatility-index, A/B ratio, reproductibility, normal pregnancy, 55

**mechanical ventilation**, pneumothoraces, active expiration, premature newborn, 1

**middle cerebral artery**, human fetus, linear-array pulsed Doppler method, 195

**minimal brain dysfunction**, dissimilar twins, neurological outcome, 245

**minor neurological dysfunction**, hypotonia, follow-up, placenta, preterm birth, intrauterine growth retardation, 79

**mother-infant interaction**, premature infants, infants, mothers, social environment, 221

**mothers**, premature infants, infants, mother-infant interaction, social environment, 221

**neonatal adaption**, clonidine, placental transfer, hypertensive pregnancy, 275

**neonatal status**, high risk infants, developmental outcome, classification system, principal components analysis, 233

**neurological outcome**, dissimilar twins, minimal brain dysfunction, 245

**normal infants**, heart rate patterns, sleep, home cardiopneumography, infants at-risk for SIDS, 175

**normal pregnancy**, blood flow velocity waveform, uterine artery, pulsatility-index, A/B ratio, reproductibility, maternal heart rate, 55

**oligohydramnios**, pulmonary hypoplasia, fetal breathing movements, premature membrane rupture, ultrasound, 37

**pancuronium**, pulmonary surfactant, randomized trial, premature infant, respiratory distress syndrome, intraventricular haemorrhage, 41

**parental leave**, early discharge, postpartum care, father, infant care, 19

**perinatal hypothyroidism**, differentiation, glia, hippocampus, 7

**perinatal mortality**, hospital delivery, intended place of delivery, 29

**periventricular leukomalacia**, infant brain, ultrasound, brain pathology, 205

**phospholipids**, sudden infant death, SIDS, pulmonary surfactant, 145

**placenta**, hypotonia, minor neurological dysfunction, follow-up, preterm birth, intrauterine growth retardation, 79

**placental transfer**, clonidine, neonatal adaption, hypertensive pregnancy, 275

**pneumothoraces**, active expiration, mechanical ventilation, premature newborn, 1

**postpartum care**, early discharge, father, infant care, parental leave, 19

**premature infant**, pulmonary surfactant, randomized trial, respiratory distress syndrome, intraventricular haemorrhage, pancuronium, 41

**premature infants**, infants, mothers, mother-infant interaction, social environment, 221

**premature membrane rupture**, pulmonary hypoplasia, oligohydramnios, fetal breathing movements, ultrasound, 37

**premature newborn**, pneumothoraces, active expiration, mechanical ventilation, 1

**preterm**, CK-BB, intracranial haemorrhage, 165

- preterm birth**, hypotonia, minor neurological dysfunction, follow-up, placenta, intra-uterine growth retardation, 79
- preterm births**, acid phosphatase polymorphism, birth weight, duration of gestation, congenital abnormalities, 257
- principal components analysis**, neonatal status, high risk infants, developmental outcome, classification system, 233
- pulmonary hypoplasia**, oligohydramnios, fetal breathing movements, premature membrane rupture, ultrasound, 37
- pulmonary surfactant**, randomized trial, premature infant, respiratory distress syndrome, intraventricular haemorrhage, pancuronium, 41
- pulmonary surfactant**, sudden infant death, SIDS, phospholipids, 145
- pulsatility-index**, blood flow velocity waveform, uterine artery, A/B ratio, reproductibility, normal pregnancy, maternal heart rate, 55
- randomized trial**, pulmonary surfactant, premature infant, respiratory distress syndrome, intraventricular haemorrhage, pancuronium, 41
- reproductibility**, blood flow velocity waveform, uterine artery, pulsatility-index, A/B ratio, normal pregnancy, maternal heart rate, 55
- respiratory distress syndrome**, pulmonary surfactant, randomized trial, premature infant, intraventricular haemorrhage, pancuronium, 41
- SIDS**, sudden infant death, pulmonary surfactant, phospholipids, 145
- sleep**, heart rate patterns, home cardiopneumography, normal infants, infants at-risk for SIDS, 175
- social environment**, premature infants, infants, mothers, mother-infant interaction, 221
- sudden infant death**, SIDS, pulmonary surfactant, phospholipids, 145
- traditional Chinese medicine**, infant supplementary medicinal foods, herbs, 157
- ultrasonography**, early pregnancy, fetal movements, drug exposure, 71
- ultrasound**, periventricular leukomalacia, infant brain, brain pathology, 205
- ultrasound**, pulmonary hypoplasia, oligohydramnios, fetal breathing movements, premature membrane rupture, 37
- uterine artery**, blood flow velocity waveform, pulsatility-index, A/B ratio, reproductibility, normal pregnancy, maternal heart rate, 55
